TRUCK CHASSI

---

SIDE HEIGHT 950-1400 MM

---

LENGTH 4200-7200 MM

---

FLOOR 5-12 MM HB500/HB450

---

SIDE 5-8 MM HB450

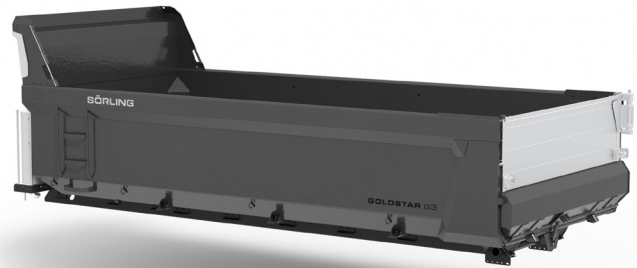

---

## A FINE-TUNED CLASSIC

Goldstar is our flagship and the result of constant innovation based on many years of experience. The combination of smart design and high strength steel create a durable and low weight dumper basket, while the stripped-back design makes it easy to keep clean.

Goldstar has a reputation for uncompromising quality – thousands of satisfied customers have used it to transport mountains of rock over the years. Goldstar Generation 3 has been developed to make your day-to-day operations easier than ever. It is more flexible than ever, and we reduced the weight by up to 150kg depending on the precise design. And by increasing the payload, you can transport bigger loads per run and maximise profitability.
